

ASTORfilz 15720

protective insulation felt – grey mottled

ASTORplast
SELBSTKLEBETECHNIK

ASTORfilz 15720

Insulation felt for noise damping, i.e. to be used separation tape in dry wall applications.

Also used for protection of window frames or other sensitive surfaces.

Properties & Applications

- Excellent noise reduction
- Insulates from „cold bridges“ in wall constructions
- Self – adhesive treatment possible – one or double sided
- Good aging resistance, free from solvents
- To be supplied as rolls in width of 10 – 1000 mm
- Also available as die-cut part, loose or on roll.

Technical Data Felt

Felt	polyester felt, mixed quality with PAN fibre
Colour	grey - mottled
Thickness	3 mm
Area weight	350 g/m ² +/- 30 g
Temperature resistance	-30°C to +80°C
Tensile Strength	ca. 50N/cm
Elongation	ca. 80%

Choice of Adhesive

- Acrylate adhesive for mounting
- double sided hotmelt adhesive as dry wall tape
- with ASTORtex 12361 – 4N removable tape, for use as protective pads with window frames

All data are single values and are not to be considered as specifications We recommend to perform own tests to ensure suitability.
